Serial Number: 08/945,249

Art Unit:

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1 and 4, drawn to a method for treating various viral diseases with pencyclovir compositions.

- II. Claims 3 and 8, drawn to various pencyclovir antiviral compositions.
- III. Claims 5-7 and 9, drawn to various pencyclovir bioprecurser compounds.

The above delineated inventions differ as distinct antiviral methods, compositions, and compounds. The grouped inventions are patentably distinct, a reference which would anticipate, or make obvious, any invention from groups I-III would not necessarily obviate, or anticipate, the inventions in any other group. The searches are not co-inclusive as indicated by the diverse nature of the subject matter, thus, would represent an undue burden on Examiner. One skilled in the art would readily practice the invention of one of the above groups with out infringing and or practicing the invention of another group. The subject matter is unique and has acquired a separate status in the art and is fully capable of supporting separate patents. For the foregoing reasons restriction is proper for examination purposes.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

Serial Number: 08/945,249 Page 3

Art Unit:

Applicant is reminded that upon the cancellation of the claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48 (b) if one or more of the currently named inventors is no longer an inventor if at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. 1.48 (b) and by the fee required under 37 C.F.R. 1.17 (h).

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variations or clearly admit on the record that this is the case. In either instance, if Examiner finds one of the inventions unpatentable over the prior art, the evidence may be used in a rejection under 35 USC 103 of the other invention.

Any inquiry concerning this communication should be directed to Russell Travers at telephone number (703) 308-4603.

Russell Travers
Primary Examiner
